Part A

```
Please enter an integer: 45
The number of digits is: 2
[gabe@fedora Lab02]$ 
```

Part B

```
Meters      Feet
1           3.280
2           6.560
3           13.120
4           26.240
5           52.480
6           104.960
7           209.920
8           419.840
9           839.680
10          1679.360
11          3358.720
12          6717.440
13          13434.880
14          26869.760
15          53739.520
[gabe@fedora Lab02]$
```

Part C

```
scissor (0), rock (1), or paper (2): 0
computer was paper and you were scissor. You win.
[gabe@fedora Lab02]$ 
```
